

Mahan Bharat Abhiyan

Gramodaya Mission

Wishes all its members on
Independence Day

from

Mahan Bharat Abhiyan & Unvishat Karya Limited

The **Project Bhu-jal Dhara** having the process for ground water elevation and restoration of the water levels, was initiated in Mogralla Village and in Munnagi Village, Andhra Pradesh and has shown amazing results and the farmers of the area have shared their experience and delight on the continuous availability of the water with positive outcomes in the flora and fauna and quality of the harvested yields in the area surrounding the process site.

The Project Bhu-jal Dhara, literally means - the underground flow of water, and as co-partners of this project the Suka Foundation, Chennai, with their in-depth knowledge of the ancient sciences have conducted this tree root management and metallurgical application process based on Siddha and Ayurveda writings in the Vedas & Brihat Samhita by Varahamihira in the period 500 CE. The two process in Andhra Pradesh villages is being monitored and the farmers are experiencing continuous flow of quality water for their drinking as well as farming needs.

Under Gramodaya Jal Aradhana programme, Abhiyan has designed plans to address all three natural accessed water management like; Rejuvenate & elevate underground water, create surface natural bodies as a clustered Water grid acting as irrigation and drain systems and rain water harvesting and fresh water pond developments.

Gramodaya Jal Aradhana

Project Bhu-jal Dhara

Restoration of underground water levels to pre-1980 standards

Mogarala and Munnagi Villages in A.P. have the pilot project roll out since January 2019

Processes based on ancient Indian sciences on chosen tree, tree root, metallurgical and hydraulic lift of water resulting in water elevation to substratum for surface use for all means of daily living and nutrient filled irrigation

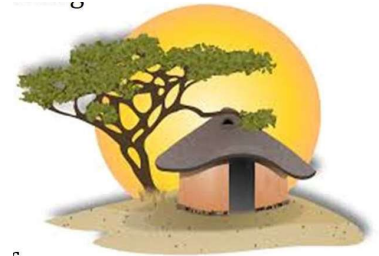

The future of India
lies in its villages.

Mahatma Gandhi

MAHAN BHARAT ABHIYAN - is a National Economic Programme based on People's movement evolved through the thought process of about 1500 selfless professionals with national commitment. 7 Members of the Group have come forward to incorporate a company under the name and style of Unvishat Karya Limited ("UKL").

There is clearly an awareness that we need to focus on rural innovations. Both the government and the private sector understand this need. Business organisations in India are catalysing rural innovations and entrepreneurs. But much more needs to be done. Among the developing countries India has the largest rural population. The Rurals have common problems such as issues in healthcare, education and essential infrastructure which include connectivity, power availability, lack of water supply, depleting harvesting water, etc.,

THE RURAL AREAS, EVEN TODAY, FORM THE BACK-BONE OF INDIA. MISSION OBJECTS

- Reverse Migration and sustenance of 20 crore of rural population with rural roots and living in urban India back to their homes.
- Build smart rural India with modern infra structure and the ancient cultural grandeur.
- A self-sustaining micromanaged rural economy.
- Globally accepted healthcare, services & facilities at rural doorstep
- People owned techno aggregation agriculture service platform.
- Revival of ancient heritage and regain natural rhythm in five elements to restore underground water tables to the pre 1980 level.

As such it has designed a massive and meticulously planned village transformation project under the name and style of Gramodaya to be executed to the mission mode. The Gramodaya mission targets 14.5 crore rural families spread across about 7 lakh villages and hamlets in a scientific manner. For this under the Gramodaya mission 63000 integrated service centres will be setup to provide 80 essential services required by every human being from birth to death under 19 categories and through 30 business verticals estimated to cost about 300 lakh crores in 10 years. 150 lakh crores will be raised through internal generation from 4th year onwards to 10th year and 150 lakh crores has to be invested from the 1st year to 6th year.
